Policy for Mailbox Replacement or Reimbursement

In the event that a mailbox and/or mailbox post is struck and damaged beyond repair by a Township's snowplow, the Township will install a new standard mailbox and/or post or you may receive a \$50.00 reimbursement. Upon notification of a damaged mailbox and/or post, the Township will investigate to determine if the mailbox was struck by a Township snowplow. The mailbox must be damaged beyond reasonable repair to be eligible for replacement or \$50 reimbursement. Whenever possible, the mailbox may be fixed and reinstalled by the Township.

Mailboxes and/or posts damaged as the result of snow thrown or pushed into them are not eligible for repair, replacement, or reimbursement. It is suggested that homeowners properly install snow guards.

The following schedule applies to all mailbox and/or post replacements or reimbursements.

1. If you chose to have your box/post repaired or replaced, the Township will install a standard 8" aluminium mailbox and 4" post in accordance with standard specifications adopted by the County Engineer.
2. If you chose a reimbursement, a check will be mailed to your address. Please allow 2-3 weeks. Residents who choose reimbursement are responsible for the installation of the new mailbox and or post.
